

QUINTEN,

I'VE GOT TO EXPRESS MY FRUSTRATION ABOUT THE ONGOING ISSUES WITH OUR FACILITIES MANAGEMENT. THAT GOD DAMN URINAL HAS BEEN OVERFLOWING FOR THREE DAYS NOW! IT'S CREATING A MESS AND AN UNSANITARY WORK ENVIRONMENT, AND NOTHING SEEMS TO BE DONE ABOUT IT.

MOREOVER, THE FILTRATION SYSTEM IS ONLY OPERATING AT HALF CAPACITY. HOW IN THE HELL ARE WE SUPPOSED TO KEEP OUR RESEARCH GOING IF WE CAN'T RELY ON ESSENTIAL INFRASTRUCTURE? OUR EXPERIMENTS ARE TIME-SENSITIVE, AND ANY LAPSE IN PROPER MAINTENANCE CAN LEAD TO COMPROMISED RESULTS OR, WORSE, DANGEROUS SITUATIONS.

WE NEED THESE ISSUES ADDRESSED IMMEDIATELY. IT'S CRITICAL FOR THE SAFETY AND EFFICIENCY OF OUR WORK. PLEASE MAKE SURE THIS GETS TAKEN CARE OF ASAP.

THANKS, LAWRENCE
